Description (Class): Customer Technical Data Sheet - Multiwell TC Plates – 12 Well			Page: 1 of 2

Applications:

TC plates are used for the growth and study of cells in monolayer culture.

A consistent Tissue Culture surface chemistry is produced using vacuum gas plasma treatment. This permanent modification of the growth surface incorporates negatively charged functional groups that create a hydrophilic (wetable) surface for cell attachment. The highly controlled vacuum gas plasma treatment creates a consistent well to well and plate to plate growth surface.

Features:

- Available in individual recyclable PET tray or bulk packaged bags
- Deep wells hold 1.5 to 2.2 ml media
- Low Evaporation Lid
 - Unique labyrinth air passage system that provides a tortuous path for gas exchange to minimize the risk of contamination and evaporation.
- Individual condensation rings above each well to prevent cross contamination.
- Large writing patch
- Alpha-Numeric well Identification
- One-way lid to reduce cross contamination
- Peel-open, Medical Style Package assuring sterile product presentation.
- Plates with different well sizes can be stacked together for efficient utilization of incubator space.
- Serrated gripping panels
- Contact Product Manager for special packaging.

Restrictions:

- In general, for use with aqueous reagents used for tissue culture.

STERILITY:

Products are gamma irradiated.

REGULATORY COMPLIANCE:

Falcon® products are manufactured under the current ISO 13485 and the current FDA Quality System Regulation 21 CFR Section 820.

Warranty/Disclaimer: Unless otherwise specified, all products are For Research Use Only. Not intended for use in diagnostic or therapeutic procedures.
