2X-CEL Chamber (80 micron) Instructions for use

- 1. Clean the 2X-CEL chamber and coverslip with kimwipe. (Do not use alcohol.)
- 2. Place the Magnetic Slide Holder on a slide warmer.
- 3. Place the 2X-CEL chamber in the center of the Magnetic Slide Holder
- 4. Position the coverslip so that both sides of the 2X-CEL chamber are covered (see reverse side for illustration).
- 5. Carefully close the magnetic clasp of the holder.
- 6. Load sample by placing a small drop of specimen (12-13 μ I) at the opening of the chamber.
- Place magnetic holder on the IVOS or microscope stage and analyze as usual.

2X-CEL Chamber (80 micron) properly positioned in Magnetic Slide Holder.
