

Corning® ELISA Microplates

Corning Stripwell microplates

ELISA assays are accurate, highly sensitive, and specific in identifying protein species. ELISA products are used in a wide range of immunodiagnostic (antigen/antibody) and DNA-based diagnostic test kits. They may also be used for cell-based ELISAs, an immunocytochemistry method to quantify target protein or post-translational modifications of the target protein in cultured cells.

Corning is a leader in manufacturing high-quality, high-performance ELISA microplates and 1 x 8 Corning Stripwell™ microplates for laboratory assays. Corning ELISA microplates have superior lot-to-lot and intra-well consistency for reproducible and reliable results. ELISA microplates enable a common laboratory procedure to be carried out on multiple samples simultaneously. Popular formats include 8-well strips, 96-well microplates, and 384-well microplates.

ELISA microplates are available in clear, black, or white polystyrene with a variety of surface chemistry choices to suit every type of assay:

SURFACE CHEMISTRIES

Medium Binding Surface

- Hydrophobic
- Ideal for large, hydrophobic biomolecules (>20kD)
- ▶ Binding capacity: ~250 ng lgG/cm²

High Binding Surface

- Hydrophobic and ionic (negatively charged)
- Ideal for positively charged biomolecules (>10kD)
- ▶ Binding capacity: ~500 ng lgG/cm²

Corning DNA-BIND® Surface

- N-oxysuccinimide
- Allows covalent immobilization to amine groups
- Ideal for DNA, proteins, and small peptides

Corning Sulfhydryl-BIND Surface

- Maleimide
- Allows covalent immobilization to sulfhydryl groups
- Ideal for biomolecules possessing an accessible sulfhydryl group

Corning Carbo-BIND Surface

- Hydrazide
- Allows covalent immobilization to CHO moieties
- Ideal for antibodies and Fab fragments

Corning Nonbinding Surface (NBS)

- Non-ionic hydrophilic surface (polyethylene oxide-like)
- Inhibits hydrophobic and ionic interactions to reduce binding
- Enhances signal-to-noise in homogeneous assays

CELL-BASED ASSAY SURFACES

Tissue Culture-treated Surface

- Hydrophilic and negatively charged due to incorporation of oxygen ions
- For attachment and growth of anchoragedependent cell lines

Corning CellBIND® Surface

- Hydrophilic and negatively charged
- Enhances cell attachment under difficult conditions
- Quickly adapts cells to reduced serum or serum-free conditions
- Improves overall attachment and yield

Corning BioCoat™ Surfaces

- Biological coatings of highly purified extracellular matrix (ECM) proteins
- Enhances attachment of transformed cell lines, transfected cells (including HEK-293), as well as a variety of primary and stem cells
- Helps cells stay attached during assay processing
- Surfaces include Poly-D-Lysine, Fibronectin, Collagen I, Gelatin, Laminin, and Corning Matrigel® matrix

Corning PureCoat™ Amine Surfaces

- Hydrophilic and ionic (positively charged)
- Ideal for small negatively charged biomolecules
- For covalent immobilization, use bifunctional crosslinkers

Corning® 96-well ELISA Microplates

Low Volume Stripwell Microplates

- Total well volume: 190 μL
- Recommended working volume: 75 to 125 μL
- Same height/path length as a standard strip
- Standard 96-well center-to-center spacing

21-040-CV	500 mL PBS (Phosphate Buffered Saline), 1x [-] calcium, magnesium		
21-040-CVR*	500 mL PBS (Phosphate Buffered Saline), 1x [-] calcium, magnesium		
25-055-CM	1L Water, cell culture grade, tested to USP Sterile Water for Injection specifications		
25-055-CV	500 mL Water, cell culture grade, tested to USP Sterile Water for Injection specifications		
AM-750UL-RD	Axygen® Axymats sealing mats for ELISA microplates, nonsterile		
BF-400-S	Axygen breathable sealing film for tissue culture, sterile		
PCR-SP	Axygen AxySeal 80 μm sealing film for short-term storage, nonsterile		
PCR-AS-200	Axygen PCR 35 μm aluminum sealing film, nonsterile		
4870	Costar® 50 mL reagent reservoirs, sterile		
4872	Costar 100 mL reagent reservoirs, sterile		
RES-SW-96-HP	Axygen single well reagent reservoir, high profile, nonsterile		
RES-MW4-HP	Axygen multiple well reagent reservoir with 4-channel trough, high profile, nonsterile		

^{*}Only available in Europe.

96-well Geometry and Dimensions

384-well Geometry and Dimensions

Quality, Support, and Service Every Step of the Way

By choosing Corning Life Sciences as your critical component supplier, you can rely on:

Rigorous Standards

We continuously invest in our quality processes. Our products are manufactured from USP Class VI materials under the current ISO 9001 standard and FDA Quality System Regulation 21 CFR 820, current good manufacturing practices (cGMP), FDA registered facility for Class 1 Medical Devices.

Certification Program

Corning's Certification Program helps you meet your critical component requirements. Detailed product descriptions, drawings, and lot-specific certificates of quality are available to help you satisfy regulatory requirements — and ensure that critical components are manufactured to your requirements each and every time.

Service and Support

Dedicated Customer Service

Our personalized customer service is the key to a successful long-term relationship. Through one-on-one support, our knowledgeable customer service representatives will answer your questions quickly and help find solutions.

Product Customization

Our products can be custom made to your test kit requirements. We can customize surface chemistries, color coding, bar coding, packaging, and certification to meet your needs.

Worldwide Sales and Distribution

We have invested in an extensive worldwide sales and distribution network to provide fast, customized, local service in all of the markets we serve. We have local sales and logistics facilities throughout Europe as well as Asia to meet the needs of today's global customers.

Lot Allocation Program

For our 1 x 8 Corning® Stripwell™ plates, we can allocate specific lots and lot sizes to meet your needs. This allows you to optimize raw material lots to match production runs, saving valuable time and money. You'll appreciate the improved product traceability that comes with specific lot control.

Scientific Support

In addition, five ELISA Application Notes are available at www.corning.com/lifesciences.

- Immobilization Principles Selecting the Surface for ELISA Assays (CLS-DD-AN-454)
- Doptimizing the Immobilization of Protein and Other Biomolecules for ELISA Assays (CLS-DD-AN-455)
- Effective Blocking Procedures in ELISA Assays (CLS-DD-AN-456)
- Optimizing the Separation Step on 96-well Microplates for ELISA Assays (CLS-DD-AN-457)
- Selecting the Detection System Colorimetric, Fluorescent, Luminescent Methods for ELISA Assays (CLS-DD-AN-458)

For more specific information on claims, visit the Certificates page at www.corning.com/lifesciences.

Warranty/Disclaimer: Unless otherwise specified, all products are for research use only. Not intended for use in diagnostic or therapeutic procedures. Not for use in humans. Corning Life Sciences makes no claims regarding the performance of these products for clinical or diagnostic applications.
