

NEW! Thermo Scientific
F1-ClipTip Pipetting System

sealed in security
feel the difference

Thermo
SCIENTIFIC

breakthrough ClipTip technology

You'll feel the difference the first time you hold the **NEW** Thermo Scientific F1-ClipTip pipetting system

Achieve newfound confidence knowing that once attached, your tips are locked firmly in place, and will not loosen or fall off regardless of application pressure. The innovative three interlocking clip design ensures the tip is held securely on the F1-ClipTip pipette until – and only until – it is released.

Worry-free pipetting is finally here. With the only tip that clips.

In liquid handling, it is a challenge to ensure a quality seal in daily pipetting. The ideal solution is for the pipette and tip to form a system that increases confidence in reproducibility, reduces forces required to attach and detach the system, and secures the best possible accuracy and precision.

FRICION
SEALING
SYSTEMS

Pipettes with a friction seal system, rely on a user's force to attach tips to the pipette, which varies from user to user.

- Increased tip attachment and ejection forces
- Loose tips which can drop off or leak air
- Decreased confidence in reproducibility of results
- Premature tip cone wear

CLIPTIP
SYSTEM

Revolutionary ClipTip interlocking technology has a locking interface between the pipette fitting and tips that seal by clipping into place.

- Extremely low tip attachment and ejection forces
- Complete seal on every channel
- No loose tips
- Reproducibility you can count on

feel the confidence

Eliminate the frustration of banging tips on your pipette.

With a light touch, each tip is 'clipped' securely on the F1-ClipTip pipette.

Consistent and reproducible pipetting – user to user,

higher quality results and more efficient research.

When ClipTip pipette tips are on, they are sealed and will not loosen.

The F1-ClipTip pipetting system remains sealed until you decide to eject tips.

accurate data.
more discoveries.

With over 40 years of pipetting innovations, expect the very best and so much more...

Ergonomic design

Offering low attachment, ejection and plunger forces for safe and comfortable use

Remarkably lightweight

Modern design protects user from the risk of Repetitive Strain Injuries (RSI)

Adjustable comfort

The 120° adjustable finger rest – for both right- and left-handed operator comfort – allows the hand to relax during pipetting cycles

Patented soft-touch tip ejection

Innovative gearing mechanism produces more downward force with less effort, releasing tips with a gentle push

Patented super blow-out

150% increase in air boost to ensure efficient delivery of micro-volumes and prevent capillary action*

Volume lock adjustment

The secure volume setting prevents undesirable volume drift during operation.

Industry-leading lifetime warranty

With convenient online registration

CE marked

The F1-ClipTip pipetting system is CE-marked in accordance with IVD Directive in Europe.

*Available in 50 µl models and below

Thermo Scientific ClipTip Pipette Tips

**The best choice in security
with a unique, patented
locking design**

Low retention

Every ClipTip pipette tip utilizes low retention technology to enable maximum sample recovery

Proven quality

Certified free of RNase, DNase, DNA, ATP and endotoxin contamination

Environmentally responsible

Our reload system uses recycled components and 30% less plastic

a secure seal for every sample

Obtaining the correct sample volume is often the first step in a series that your research requires. **The F1-ClipTip pipetting system** ensures you have a complete seal for each channel when the tips are locked into place. Whether you're using a single or multichannel pipette, you will get the exact volume you expect to accelerate discovery.

No more uncertainty – just confidence in your applications

Once attached the ClipTip pipette tips are locked in place forming a complete seal on every channel. Your friction based pipetting system might look like tips are on, but how certain are you?
