Corning Incorporated Life Sciences

Registered ISO 9001 **Product Description**

Catalog Number:	431212			
Product Description:	Corning® syringe filter, regenerated cellulose (RC) membrane, 0.20 μM pore size, 4 mm diameter, individually packaged			
Component Materials: Housing - Membrane -	Polypropylene, meets USP, Class VI requirements for plastic containers and closures. Regenerated Cellulose (RC), 0.20 μ M pore size, meets USP, Class VI requirements for plastic containers and closures.			
Product Dimensions: Diameter of unit Diameter of membrane Effective filtration area	- 0.47 in. (12 mm) - 0.16 in. (4 mm) - 0.07 cm²	Length of unit Tolerances	-	0.79 in. (20 mm) +/- 0.05 in. (1.3 mm)

Sterilization:

This lot has been irradiated and dosimetrically released based on the *Sterilization of healthcare products-Requirements for validation and routine control-Radiation sterilization*. Sterility Assurance Level: SAL 10⁻⁵

Pyrogens:

The product has been tested and has met the criteria established in the current version of ANSI/AAMI ST 72: *Bacterial Endotoxins - Test methodologies, routine testing, and alternative to batch testing.* Results: less than 0.1EU/mL.

HPLC Certified:

The product has been tested to ensure there are no extraneous peaks in the UV range.

Membrane Bubble Point:

The product has been tested according to an established procedure to determine the water bubble point of the product. The product meets the established criteria of >3.5 bar.

Housing Burst Pressure Test:

The product has been tested according to an established procedure to determine the housing burst pressure. The product meets the established criteria of >6 bar (approx. 87 psi).

Flow Rate Test:

The product has been tested according to an established procedure to determine the flow rate. The product meets the established criteria of >3.5 mL/min/bar.

Bacterial Challenge:

The product has been tested and determined to be quantitatively retentive when challenged with a concentration of 10⁷ organisms per cm² using *Brevundimonus diminuta*.

Performance Testing:

Each manufacturing lot is sampled and tested in accordance with Standard Operating Procedures.Pressure Hold Test:Forward pressurization of the unit to 1.5 bar.Visual Attributes:Visual examination of the product.Packaging:Inspection for seal and barrier integrity, accurate labeling, and correct product configuration.

Lot Number Designation:

8 Digit Lot Number: First 3 digits - Julian date of manufacture; Next 2 digits - Year of manufacture; Last 3 digits - Run number for that year.

Revision Date:

01-24-19
