

# CD133 (Prominin-1) Monoclonal Antibody (13A4), Biotin, eBioscience™

<b>Product Details</b>	
Size	100 μg
Species Reactivity	Dog, Mouse
Published Species	Mouse, Human
Host/Isotype	Rat / IgG1, kappa
Recommended Isotype Control	Rat IgG1 kappa Isotype Control (eBRG1), Biotin, eBioscience™
Class	Monoclonal
Type	Antibody
Clone	13A4
Conjugate	Biotin
Form	Liquid
Concentration	0.5 mg/mL
Purification	Affinity chromatography
Storage buffer	PBS, pH 7.2, with 0.1% gelatin
Contains	0.09% sodium azide
Storage conditions	4° C, store in dark, DO NOT FREEZE!
RRID	AB_466591

Applications	Tested Dilution	Publications
Western Blot (WB)	-	3 Publications
Immunohistochemistry (IHC)	-	14 Publications
Immunocytochemistry (ICC/IF)	-	5 Publications
Flow Cytometry (Flow)	0.125 µg/test	24 Publications

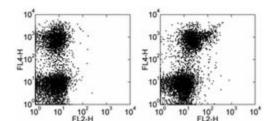

#### **Product Specific Information**

Description: The 13A4 monoclonal antibody recognizes mouse Prominin-1 (sometimes also referred to as CD133 and, in the case of the human orthologue, as AC133), a 115-120 kDa pentaspan transmembrane (5-TM) domain glycoprotein. Prominin-1 is expressed on primitive cells such as hematopoietic stem and progenitor cells, neural and endothelial stem cells, retina and retinoblastoma, as well as developing epithelium. To date, the function and ligand of Prominin-1 are unknown. The 13A4 antibody does not cross react with rat, human, chicken, or Drosophila antigen but has been reported to work in canine/dog.

Applications Reported: The 13A4 antibody has been reported for use in flow cytometric analysis. It does not cross-react with rat and human Prominin-1.

Applications Tested: The 13A4 antibody has been tested by flow cytometric analysis of mouse bone marrow cells. This can be used at less than or equal to 0.125 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.

## Product Images For CD133 (Prominin-1) Monoclonal Antibody (13A4), Biotin, eBioscience™

## CD133 (Prominin-1) Antibody (13-1331-82) in Flow

Staining of BALB/c bone marrow cells with Anti-Mouse CD11b APC (Product # 17-0112-82) and 0.06  $\mu$ g of Rat IgG1 kappa Isotype Control Biotin (Product # 13-4301-82) (left) or 0.06  $\mu$ g of Anti-Mouse CD133 (Prominin-1) Biotin (right) followed by Streptavidin PE (Product # 12-4317-87). Total viable cells were used for analysis.
