

Axygen® 5 mL Snaplock Microcentrifuge Tubes

AXYGEN

A Corning Brand

Axygen 5 mL Snaplock microcentrifuge tubes fit in standard 15 mL centrifuge rotors and offer greater convenience for lower volume sample requirements. Smaller volume tubes minimize contamination issues – pipet tips can easily reach into the tube for sample accessibility.

Expect the same high performance as other trusted Axxygen Snaplock microcentrifuge tubes.

The Axxygen 5 mL Snaplock microcentrifuge tubes work ideally with the Corning® LSE™ compact centrifuge and combination rotor for 5, 15, and 50 mL tubes.

Features include:

- ▶ Will withstand up to 14,000 RCF
- ▶ Frosted cap
- ▶ Snaplock cap assures an efficient seal, yet is still easy to “flip” open
- ▶ Certified RNase-/DNase-free
- ▶ Nonpyrogenic
- ▶ Frosted marking patch on tube body for labeling
- ▶ Reference graduations at 0.5 mL increments
- ▶ Available in clear and amber
- ▶ Autoclavable to 120°C (15 minutes at 15 psi)
