

PRODUCT INFORMATION

M13/pUC reverse sequencing primer (-26), 17-mer

5' -d(CAGGAAACAGCTATGAC)-3'

#S0101 0.1A₂₆₀ units
(supplied as 10 pmol/μL aqueous solution)

Lot: —

Concentration: 10 μM (10 pmol/μL)

Volume: 60 μL

T_m: 50°C

CG content: 47%

Store at -20°C

Description

This primer is a synthetic single-stranded 17-mer oligonucleotide with free 5'- and 3'-hydroxyl ends. The primer anneals to the 5'-terminus of the *lacZ* gene such that its 5'-end lies 26 nucleotides upstream of the *EcoRI* site of M13 mp18. The DNA polymerase extension products grow in the direction that coincides with the transcription of the *lacZ* gene.

The primer is supplied as an aqueous solution and can be used for DNA sequencing of all phages, phagemides and plasmids carrying *lacZ* gene.

CERTIFICATE OF ANALYSIS

Each lot of the M13/pUC reverse sequencing primer is assayed in the dideoxy sequencing reaction using pUC19 DNA.

Quality authorized by:

 Jurgita Zilinskiene

PRODUCT USE LIMITATION

This product is developed, designed and sold exclusively *for research purposes and in vitro use only*. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.

Please refer to www.thermoscientific.com/onebio for Material Safety Data Sheet of the product.
