Make the better choice

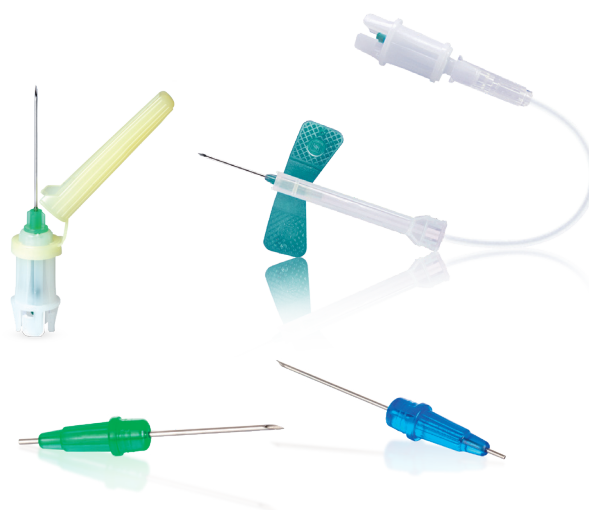

Blood Collection Systems for Veterinary Medicine

- Extended shelf life supportive in avoiding waste
- Fresh vacuum guarantees correct filling and reliable results
- Good sample quality guaranteed without Magnesium contamination
- Volume variety covering requirements of small + large animals
- Compatibility with major analyzers fulfilled

Comprehensive solutions for specimen collection

Professional laboratory tests for small animals like dogs and cats are routine in any veterinary practice. Regardless of the patients' size, Sarstedt offers a wide range of solutions tailored to any individual requirement (for example with volumes from 0.1ml to 8.2 ml).

The S-Monovette[®], for example, is the ideal solution for gentle venous blood collection from large dogs.

Alternatively, blood can be collected by dripping into prepared tubes.
